★Table 11A9.2, ENC Codes, Codes P-Z, Note 5D. (Added) (MAFB) Locally assigned exception codes are validated quarterly. RPS processes utility program in January, April, July and October. Forward all copies to the Stock Control Element for distribution to the appropriate monitor. If the capability exists, the Stock Control Element will produce the listing using ASNUD. The monitor reviews, validates, and processes updates as required. Element supervisors date and sign the list to indicate all required actions are taken and retain the listing until the next quarterly review. Where dual monitors are assigned affecting organizations outside the COS function, the appropriate supply monitor initiates the review with the outside activity.
